

IT'S EASY BEING GREEN

YOU COULD BE SPENDING UP TO \$1,400 ON ENERGY USE THAT YOU DIDN'T EVEN KNOW ABOUT

Most electronic components today continue to draw power even when not in use. Reduce your "phantom" electricity loads by unplugging easily accessible power cords or better yet, ORGANIZE your cords into an energy saving "power strip". Easy Does It Professional Organizing offers energy audits on your commonly used appliances or components which can help control your energy consumption and save your money.

PRODUCT TYPE	QTY	COST PER YEAR OFF OR ON-IDLE	COST PER YEAR ON OR IN USE	EXAMPLE ANNUAL COST
DESKTOP PC	2	\$9.57 EACH	\$130.23 EACH	\$260.46

GRAND TOTAL ENERGY COST				\$1,430.56

VISIT PLANETGREEN.COM TO LEARN HOW & WHY GREENSBURG, KANSAS IS GOING GREEN

Greensburg, Kansas was hit by a catastrophic tornado in 2007 that destroyed the entire city. Watch how they recover and rebuild their community to the first GREEN city in America on Discovery/HD. VISIT <http://planetgreen.discovery.com/tv/greensburg/> to find programming information for your area.

GET LAZY WHEN RECYCLING PLASTIC AND GLASS BOTTLES

Don't re-attach the cap to your bottles when recycling, just rinse out and toss the empty, open bottle and cap into the receptacle. Caps that have to be removed by the workers at the Recycling facility costs extra time and money. Seems like a small issue yet sometimes the bottles are thrown away to defray this cost and that defeats all your good efforts. Worse yet, caps can become **projectile devices** during the recycling process and can shot off and hit workers. *That's the BEST reason to GET LAZY and NOT re-attach the cap to your recycled bottles.*

SAVE MONEY, INK AND PAPER WITH THIS SIMPLE SOFTWARE

Download this FREE software program called *GreenPrint* available at <http://www.printgreener.com>. It automatically removes blank pages and can remove banner ads and other elements that use up your valuable ink. **EASY FACTS** Average cost of a wasted page **\$0.06**. The average employee prints 6 wasted pages per day, totaling 1,410 wasted pages per year! America, the world's largest producer and consumer of paper, consumes over six times greater than the world average.

EASY TIP - INCREASE YOUR MILES PER GALLON & SAVE MONEY ON WHATEVER CAR YOU DRIVE

Drive at a moderate speed where ever you drive. It simply takes more fuel to power the car through the air. A recent study done by Consumer Reports indicated that driving 65 rather than 55 caused a Toyota Camry's fuel economy to **drop** from 40 to 35 mpg. Speeding up to 75 mph cost the car another 5 mpg. Aerodynamic drag increases exponentially the faster you drive. Decreasing your speed by 5 miles per hour will ensure your miles per gallon are working efficiently.

EASY TIPS

Cell Phone SAVINGS
Check your cell phone bills for your plan's minute use. If you notice a pattern - always over or under—call to up or down grade your plan and save money.

SAVE on every Gallon of Gas
Every penny counts and where you buy gas can make a big difference. Click on the gas handle below to visit a web site that provides the lowest gas prices in your area.

Jot it Down
Multiple trips to the store to pick up forgotten items can double your to-do list and waste your valuable time and energy.
Keep a notepad handy or make a daily to-do list.
